Allowable Subject Matter

1. Claims 1-13, and 15-21 are allowed.
2. The following is an examiner's statement of reasons for allowance: There is no teaching or suggestion in the prior art of the claimed combination having the mounting portion being configured and arranged relative to the first and second mounting flanges to define a transverse center plane that is perpendicular to the second pivot axis and passes between the first and second mounting flanges and through the center axis of the curved mounting surface with the first mounting flange being located on a first side of the center plane and the second mounting flange being located on a second side of the center plane that is opposite to the first side of the plane, the center plane being equally spaced and parallel to a transverse front plane passing through a forward most edge of the curved mounting surface and a transverse rear plane passing through a rearward most edge of the curved mounting surface, the front and rear planes defining a mounting area there between, the first and second mounting flanges having different axial widths as measured along the second pivot axis with the wider of the first and second mounting flanges being arranged such that a majority of its axial width is located outside the mounting area in an axial direction, the first and second mounting flanges having first and second rear surfaces that are spaced apart by an axial distance larger than an axial space between the front and rear planes; re claim 2, a curved mounting surface having a center axis, the mounting portion being configured and arranged to define a transverse front plane passing through a forward most edge of the curved mounting surface, the front and rear planes defining a mounting area there between, the
